Reporting Form ARF 746.0A

ABS/RBA Personal Credit Stocks, Flows and Interest Rates (Standard)

Instructions

These instructions assist completion of *Reporting Form ARF 746.0A ABS/RBA Personal Credit Stocks, Flows and Interest Rates (Standard)* (ARF 746.0A). ARF 746.0A collects information relating to the personal credit stocks, flows and interest rates of *ADIs* and *RFCs*.

Information reported in ARF 746.0A is required primarily for purposes of the *ABS* and the *RBA*. This information is required for various purposes, including policy and statistical purposes. This information may also be used by *APRA* for prudential and publication purposes.

Reporting level

ARF 746.0A must be completed for each *ADI* and *RFC* to which this Reporting Standard applies under paragraphs 4 or 5.

Reporting basis and unit of measurement

These instructions specify the reporting basis and unit of measurement that applies to each item.

For reporting purposes, unless specified otherwise, enter data as a positive number.

Counterparties

For the purposes of this form, report only finance to *households* for *personal* purposes.

For the purposes of this form, *households* may exist in either the *resident* or *non-resident* sectors.

Positions with *resident* and *non-resident households* are collected separately.

Types of finance

For the purposes of this form, finance includes:

- *loans*; and
- *finance leases*.

When reporting information on the stock of outstanding finance (e.g. *credit outstanding*), only include finance that is held on-balance sheet, unless otherwise directed.

Reporting by purpose

Classify finance at the lowest level at which it is able to be identified; the purpose that the funds will be used for determines whether (and where) it is reported on this form. Where finance

(identified at the lowest available level) is to be used for more than one purpose, classify that finance to its predominant purpose (based on the purpose for which the largest share of the funds will be used).

Credit outstanding & credit outstanding, net of offset account balances

Report outstanding finance under the category in which it sits as at the end of the *reporting period*. For example, if a *loan* was originally classified as having a *fixed interest rate* but now has a *variable interest rate* then report it as *variable interest rate* for the current *reporting period*.

Treatment of facilities

Where there is a finance *facility* with a mix of *interest rate* or repayment types, follow the instructions below.

When reporting on the number of *facilities*, report each *facility* once. Where *interest rate* types or repayment types are separately identified, report the number of *facilities* according to the predominant *interest rate* type or repayment type by value.

When reporting the value of finance, apportion across the relevant *interest rate* type and/or repayment type dimensions.

When reporting the *weighted average interest rate*, weight each *interest rate* by its corresponding balance outstanding.

Values

Unless otherwise specifically stated, information reported on this form must comply with Australian Accounting Standards.

Report monetary amounts on ARF 746.0A in Australian dollars or the Australian dollar equivalent of the foreign currency. Convert amounts denominated in foreign currency to AUD in accordance with *AASB 121 The Effects of Changes in Foreign Exchange Rates* (AASB 121).

Report values on ARF 746.0A as whole dollars.

Numbers

Report numbers on ARF 746.0A unscaled, as whole numbers for *ADIs* and *RFCs*.

Interest rates

ADIs and *RFCs* are required to report contractual *interest rates*. Report *interest rates* as an annualised percentage rate (on a 365 days per year basis) to two decimal places.

Refer to the *interest rates* definition for further guidance (ARS 701.0).

Cost of funds and margin

Cost of funds and *margin* items are to be reported as an annualised percentage rate to two decimal places.

Standard Business Reporting (SBR)

Report items on ARF 746.0A with accounting type of debit (assets). The accounting type (i.e. credit or debit) applies to all monetary items and represents the natural accounting type of the item collected.

For example, if a *loan* was originally classified as having a *fixed interest rate* but now has a *variable interest rate* then report it as *variable interest rate* for the current *reporting period*.

When reporting on the number of *facilities*, report each *facility* once. Where *interest rate* types or repayment types are separately identified, report the number of *facilities* according to the predominant *interest rate* type or repayment type by value.

When reporting the value of finance, apportion across the relevant *interest rate* type and/or repayment type dimensions.

When reporting the *weighted average interest rate*, weight each *interest rate* by its corresponding balance outstanding.
