# Reporting Form ARF 748.0A

## ABS/RBA Wholesale Funding Stocks, Flows and Interest Rates (Standard)

### Instructions

These instructions assist completion of *Reporting Form ARF 748.0A ABS/RBA Wholesale Funding Stocks, Flows and Interest Rates (Standard)* (ARF 748.0A). ARF 748.0A collects information relating to the wholesale funding stocks, flows and interest rates of **ADIs** and **RFCs**.

Information reported in ARF 748.0A is required primarily for purposes of the **ABS** and the **RBA**. This information is required for various purposes, including policy and statistical purposes. This information may also be used by **APRA** for prudential and publication purposes.

### Reporting level

ARF 748.0A must be completed by each **ADI** and **RFC** to which this Reporting Standard applies under paragraphs 4 or 5.

### Reporting basis and unit of measurement

The instructions specify the reporting basis and unit of measurement that applies to each item.

For reporting purposes, unless specified otherwise, enter data as a positive number.

### Counterparties

Include positions with **non-residents** on this form unless otherwise directed. Refer to the specific instructions to determine whether positions with **non-residents** must be included, and whether these are separately identified.

Include positions with **related parties** on this form unless otherwise directed. Refer to the specific instructions to determine whether positions with **related parties** must be included, and whether these are separately identified.

### Values

Report the value of **debt securities** and the value of funding liabilities other than **deposits** and **debt securities** in accordance with Australian accounting standards. Where denominated in foreign currency, convert the value of **debt securities** and of funding liabilities other than **deposits** and **debt securities** to AUD in accordance with *AASB 121 The Effects of Changes in Foreign Exchange Rates* (AASB 121).

Report values on ARF 748.0A as whole dollars.

## Averages

Report averages on ARF 748.0A unscaled, as numbers to two decimal places.

## Interest rates

*ADIs* and *RFCs* are required to report contractual *interest rates*. Report these contractual *interest rates* as an outright rate rather than a spread. For example, for a fixed-rate debt security, the contractual *interest rate* would be the annualised coupon rate (or annualised implied *interest rate* in the case of a discount security). For a floating-rate debt security, the contractual *interest rate* would be the value of the floating benchmark rate as at the end of the reporting period plus the spread (again, annualised if required).

For *debt securities* issued in foreign currency, do not convert the *interest rate* back to an implied AUD rate.

Report *interest rates* as an annualised percentage rate (on a 365 days per year basis) to two decimal places.

Refer to the *interest rates* definition for further guidance (ARS 701.0).

## Value of funds and margin

Report *value of funds* and *margin* items as an annualised percentage rate to two decimal places.

## Standard Business Reporting (SBR)

Report items on ARF 748.0A with accounting type of credit (liabilities) unless otherwise directed. The accounting type (i.e. credit or debit) applies to all monetary items and represents the natural accounting treatment of the item collected.

## Specific instructions

Terms highlighted in *bold italics* are defined in ARS 701.0.

All derived fields in the form are shaded in grey are explained in words as a mathematical expression in these instructions.

Examples included under 'Include' and 'Exclude' must not be taken as an exhaustive list of items to be included or excluded.

# Reporting Form ARF 748.0B

## ABS/RBA Wholesale Funding Stocks, Flows and Interest Rates (Reduced)

### Instructions

These instructions assist completion of *Reporting Form ARF 748.0B ABS/RBA Wholesale Funding Stocks, Flows and Interest Rates (Reduced)* (ARF 748.0B). ARF 748.0B collects information relating to the wholesale funding stocks, flows and interest rates of **ADIs** and **RFCs**.

Information reported in ARF 748.0B is required primarily for purposes of the **ABS** and the **RBA**. This information is required for various purposes, including policy and statistical purposes. This information may also be used by **APRA** for prudential and publication purposes.

### Reporting level

ARF 748.0B must be completed by each **ADI** and **RFC** to which this Reporting Standard applies under paragraphs 4 or 5.

### Reporting basis and unit of measurement

The instructions specify the reporting basis and unit of measurement that applies to each item.

For reporting purposes, unless specified otherwise, enter data as a positive number.

### Counterparties

Include positions with **non-residents** on this form unless otherwise directed. Refer to the specific instructions to determine whether positions with **non-residents** must be included, and whether these are separately identified.

Include positions with **related parties** on this form unless otherwise directed. Refer to the specific instructions to determine whether positions with **related parties** must be included, and whether these are separately identified.

### Values

Report the value of **debt securities** and the value of funding liabilities other than **deposits** and **debt securities** in accordance with Australian accounting standards. Where denominated in foreign currency, convert the value of **debt securities** and of funding liabilities other than **deposits** and **debt securities** to AUD in accordance with AASB 121.

Report values on ARF 748.0B as whole dollars.

### Averages

Report averages on ARF 748.0B unscaled, as numbers to two decimal places.

## Interest rates

*ADIs* and *RFCs* are required to report contractual *interest rates*. Report these contractual *interest rates* as an outright rate rather than a spread. For example, for a fixed-rate debt security, the contractual *interest rate* would be the annualised coupon rate (or annualised implied *interest rate* in the case of a discount security). For a floating-rate debt security, the contractual *interest rate* would be the value of the floating benchmark rate as at the end of the reporting period plus the spread (again, annualised if required).

For *debt securities* issued in foreign currency, do not convert the *interest rate* back to an implied AUD rate.

Report *interest rates* as an annualised percentage rate (on a 365 days per year basis) to two decimal places.

Refer to the *interest rates* definition for further guidance (ARS 701.0).

## Value of funds and margin

Report *value of funds* and *margin* items as an annualised percentage rate to two decimal places.

## Standard Business Reporting (SBR)

Report items on ARF 748.0B with accounting type of credit (liabilities). The accounting type (i.e. credit or debit) applies to all monetary items and represents the natural accounting treatment of the item collected.

## Specific instructions

Terms highlighted in *bold italics* are defined in ARS 701.0.

All derived fields in the form are shaded in grey are explained in words as a mathematical expression in these instructions.

Examples included under 'Include' and 'Exclude' must not be taken as an exhaustive list of items to be included or excluded.
