

Reporting Standard ARS 112.0

Capital Adequacy: Standardised Approach to Credit Risk

Objective of this Reporting Standard

This Reporting Standard sets out requirements for the provision of information to APRA relating to an authorised deposit-taking institution's on- and off-balance sheet exposures that are subject to calculations using the standardised approach to credit risk.

It includes associated instructions (all of which are attached and form part of this Reporting Standard) and should be read in conjunction with *Prudential Standard APS 112 Capital Adequacy: Standardised Approach to Credit Risk*.

Authority

1. This Reporting Standard is made under section 13 of the *Financial Sector (Collection of Data) Act 2001*.

Purpose

2. The information reported to APRA under this Reporting Standard is used by APRA for the purpose of prudential supervision including assessing compliance with capital adequacy standards. It may also be used by the Reserve Bank of Australia (RBA) and the Australian Bureau of Statistics (ABS).

Application and commencement

3. This Reporting Standard applies to an authorised deposit-taking institution (ADI) that is applying the standardised approach to credit risk to all or part of its exposures for capital adequacy purposes (refer to *Prudential Standard APS 112 Capital Adequacy: Standardised Approach to Credit Risk* (APS 112) or *Prudential Standard APS 113 Capital Adequacy: Internal Ratings-based Approach to Credit Risk* (APS 113), as appropriate).
4. This Reporting Standard may also apply to the non-operating holding company (NOHC) of an ADI (refer to paragraph 7).
5. This Reporting Standard commences on 1 January 2023.

Information required

6. An ADI to which this Reporting Standard applies must provide APRA with the information required by this Reporting Standard designated for an ADI at Level 1 in respect of each reporting period.
7. If an ADI to which this Reporting Standard applies is part of a Level 2 group, the ADI must also provide APRA with the information required by this Reporting Standard designated for an ADI at Level 2 for each reporting period, unless the ADI is a subsidiary of an authorised NOHC. If the ADI is a subsidiary of an authorised NOHC, the ADI's immediate parent NOHC must provide APRA with the information required by that form for each reporting period. In doing so, the immediate parent NOHC must comply with this Reporting Standard (other than paragraphs 6 and 13) as if it were the relevant ADI

Method of submission

8. The information required by this Reporting Standard must be given to APRA:
 - (a) in electronic format using an electronic method available on APRA's website; or
 - (b) by a method notified by APRA prior to submission.

Reporting periods and due dates

9. Subject to paragraph 10, an ADI to which this Reporting Standard applies must provide the information required by this Reporting Standard for each quarter based on the financial year (within the meaning of the *Corporations Act 2001*) of the ADI.
10. APRA may, by notice in writing, change the reporting periods, or specified reporting periods, for a particular ADI, to require it to provide the information required by this Reporting Standard more frequently, or less frequently, having regard to:
 - (a) the particular circumstances of the ADI;
 - (b) the extent to which the information is required for the purposes of the prudential supervision of the ADI; and
 - (c) the requirements of the RBA or the ABS.
11. The information required by this Reporting Standard must be provided to APRA within 35 calendar days after the end of the reporting period to which this information relates.
12. APRA may grant an ADI an extension of a due date in writing, in which case the new due date for the provision of the information will be the date on the notice of extension.

Note: For the avoidance of doubt, if the due date for a particular reporting period falls on a day other than a usual business day, an ADI is nonetheless required to submit the information required no later than the due date.

Quality control

13. All information provided by an ADI under this Reporting Standard (except for the information required under paragraph 7) must be the product of systems, processes and

controls that have been reviewed and tested by the external auditor of the ADI as set out in *Prudential Standard APS 310 Audit and Related Matters*. Relevant standards and guidance statements issued by the Auditing and Assurance Standards Board provide information on the scope and nature of the review and testing required from external auditors. This review and testing must be done on an annual basis or more frequently if required by the external auditor to enable the external auditor to form an opinion on the accuracy and reliability of the information provided by an ADI under this Reporting Standard.

14. All information provided by an ADI under this Reporting Standard must be subject to processes and controls developed by the ADI for the internal review and authorisation of that information. These systems, processes and controls are to assure the completeness and reliability of the information provided.

Authorisation

15. When an officer or agent of an ADI provides the information required by this Reporting Standard using an electronic format, the officer or agent must digitally sign the relevant information using a digital certificate acceptable to APRA.

Variations

16. APRA may, by written notice to the ADI, vary the reporting requirements of this Reporting Standard in relation to that ADI.

Transition

17. An ADI must report under the old reporting standard in respect of a transitional reporting period. For these purposes:

old reporting standard means the reporting standard revoked by the determination that makes this Reporting Standard (being the reporting standard that this Reporting Standard replaces); and

transitional reporting period means a reporting period under the old reporting standard:

- (a) that ended before the date of revocation of the old reporting standard; and
- (b) in relation to which the ADI was required, under the old reporting standard, to report by a date on or after the date of revocation of the old reporting standard.

Note: For the avoidance of doubt, if an ADI was required to report under an old reporting standard, and the reporting documents were due before the date of revocation of the old reporting standard, the ADI is still required to provide any overdue reporting documents in accordance with the old reporting standard.

Interpretation

18. In this Reporting Standard the following definitions are applicable:

AASB has the meaning in section 9 of the *Corporations Act 2001*.

ADI means an authorised deposit-taking institution within the meaning of the *Banking Act 1959*.

APRA means the Australian Prudential Regulation Authority established under the *Australian Prudential Regulation Authority Act 1998*.

APS 001 means *Prudential Standard APS 001 Definitions*.

authorised NOHC has the meaning given in the *Banking Act 1959*.

business days means ordinary business days, exclusive of Saturdays, Sundays and public holidays.

due date means the relevant due date under paragraph 11 or, if applicable, the date on a notice of extension given under paragraph 12.

foreign ADI has the meaning in section 5 of the *Banking Act 1959*.

highest parent entity means an ADI that satisfies all of the following conditions:

- (a) it is locally-incorporated;
- (b) it has at least one subsidiary (within the meaning of *AASB 127 Consolidated and Separate Financial Statements* (AASB 127)); and
- (c) it is not itself a subsidiary (within the meaning of AASB 127) of an ADI that is locally-incorporated.

immediate parent NOHC means an authorised NOHC, or a subsidiary of an authorised NOHC, that is an immediate parent NOHC.

IRB approach refers to the internal ratings-based approach to credit risk, as set out in APS 113.

Level 1 has the meaning in APS 001.

Level 2 has the meaning in APS 001.

locally incorporated means incorporated in Australia or in a State or Territory of Australia, by or under a Commonwealth, State or territory law.

reporting period means a period mentioned in paragraph 9 or, if applicable, paragraph 10.

19. Unless the contrary intention appears, a reference to an Act, Prudential Standard, Reporting Standard, Australian Accounting or Auditing and Assurance Standard is a reference to the instrument as in force from time to time.

Reporting Standard ARS 112.0

Capital Adequacy: Standardised Approach to Credit Risk

General instructions

Application to an IRB or an applicant IRB ADI

An ADI that has received IRB approval under APS 113 and has approval for partial use of the standardised approach under APS 112 is expected to report under this reporting form in respect of operations that remain under standardised approach.

An ADI that is operating under the APS 112 standardised approach to credit risk, but has applied to adopt IRB approach is expected to continue to meet the requirements of this standard for all exposures. In addition, the ADI is expected to meet the requirements in ARS 113 for those exposures they are seeking approval to use the IRB approach under APS 113 and separately report under this form in respect of operations that will remain under standardised approach (i.e. partial use).

Securitisation deconsolidation principle

Except as otherwise specified in these instructions, the following applies:

1. Where an *ADI* (or a member of its *Level 2* consolidated group) participates in a securitisation that meets *APRA's* operational requirements for regulatory capital relief under *Prudential Standard APS 120 Securitisation* (APS 120):
 - (a) special purpose vehicles (SPVs) holding securitised assets may be treated as non-consolidated independent third parties for regulatory reporting purposes, irrespective of whether the SPVs (or their assets) are consolidated for accounting purposes; and
 - (b) the assets, liabilities, revenues and expenses of the relevant SPVs may be excluded from the *ADI's* reported amounts in *APRA's* regulatory reporting returns.
2. Where an *ADI* (or a member of its *Level 2* consolidated group) participates in a securitisation that does not meet *APRA's* operational requirements for regulatory capital relief under APS 120, or the *ADI* undertakes a funding-only securitisation or synthetic securitisation, such assets are to be reported as on-balance sheet in *APRA's* regulatory reporting returns.

Definitions

All terms highlighted in *bold italics* in this Reporting Standard are as defined in APS 112.

Specific instructions

Table 1: Capital Adequacy: Standardised Approach to Credit Risk

Scope

The risk-weighting process used for measuring the credit RWA of an ADI covers all or part of the ADI's exposures that are subject to the standardised approach, except the following specifically excluded items:

- a) those assets or investments that are required to be deducted from Tier 1 and/or Tier 2 capital under *Prudential Standard APS 111 Capital Adequacy: Measurement of Capital* (APS 111);
- b) securitisation exposures, which are subject to the requirements of APS 120; and
- c) exposures of an overseas banking subsidiary that is prudentially regulated by a prescribed New Zealand authority.

Reporting basis

Complete Table 1 for all exposures that use the standardised approach to credit risk, excluding exposures held by New Zealand subsidiaries.

The table is to be completed at Level 1 and Level 2 by all ADIs other than foreign ADIs and providers of purchased payment facilities.

If an ADI is a subsidiary of a NOHC, the report at Level 2 is to be provided by the ADI's immediate parent NOHC.¹

Report data as at the end of the reporting period.

Reporting tables

¹ Refer to paragraph 7 of this reporting standard.

The table described in this reporting standard lists each of the data fields required to be reported. The data fields are listed sequentially in the column order that they will appear in the reported data set. Constraints on the data that can be reported for each field have also been provided. The Unique identifier column indicates which field or fields form the primary key of the table. Where a field has ‘Y’ in the Unique identifier column, this denotes that this field forms part of the primary key for the table. A blank cell in the Unique identifier column means that the field does not form part of the primary key for the table. Any specific combination of values in the fields that form the primary key of a table must not appear on more than one row in that table when reported.

Units of measurement

Report all values in whole Australian dollars (no decimal place).

Convert amounts denominated in foreign currency to Australian dollars in accordance with Australian Accounting Standards.
