

Reporting Standard ARS 110.0

Capital Adequacy

Objective of this Reporting Standard

This Reporting Standard sets out the requirements for the provision of information to APRA relating to an authorised deposit-taking institution's capital adequacy. It includes associated instructions and should be read in conjunction with *Prudential Standard APS 110 Capital Adequacy* and *Prudential Standard APS 111 Capital Adequacy: Measurement of Capital*.

Authority

1. This Reporting Standard is made under section 13 of the *Financial Sector (Collection of Data) Act 2001*.

Purpose

2. Information collected in this Reporting Standard is used by APRA for the purpose of prudential supervision, including assessing compliance with *Prudential Standard APS 110 Capital Adequacy* (APS 110) and *Prudential Standard APS 111 Capital Adequacy: Measurement of Capital* (APS 111). It may also be used by the Reserve Bank of Australia (RBA) and the Australian Bureau of Statistics (ABS).

Application and commencement

3. This Reporting Standard applies to all authorised deposit-taking institutions (ADIs) and immediate parent non-operating holding companies (NOHCs), with the exception of:
 - (a) foreign ADIs; and
 - (b) providers of purchased payment facilities.
4. This Reporting Standard applies for reporting periods ending on or after 30 September 2025.

Information required

5. An ADI to which this Reporting Standard applies must provide APRA with the information required by *Reporting Standard ARS 110.0 Capital Adequacy* (ARS 110.0) for an ADI at Level 1 for each reporting period.

6. If an ADI to which this Reporting Standard applies is part of a Level 2 group, the ADI must also provide APRA with the information required by this reporting standard for an ADI at Level 2 for each reporting period, unless the ADI is a subsidiary of an authorised NOHC. If the ADI is a subsidiary of an authorised NOHC, the ADI's immediate parent NOHC must provide APRA with the information required by that form for each reporting period. In doing so, the immediate parent NOHC must comply with this Reporting Standard (other than paragraphs 5 and 12) as if it were the relevant ADI.

Method of submission

7. The information required by this Reporting Standard must be given to APRA:
 - (a) in electronic format using an electronic method available on APRA's website; or
 - (b) by a method notified by APRA prior to submission.

Reporting periods and due dates

8. Subject to paragraphs 9 and 10, an ADI to which this Reporting Standard applies must provide the information required by this Reporting Standard in respect of each quarter based on the ADI's financial year (within the meaning of the *Corporations Act 2001*). The due date for doing so is set out in paragraph 10.
9. APRA may, by notice in writing, vary the reporting periods, or specified reporting periods, for a particular ADI, to require it to provide the information required by this Reporting Standard more frequently, or less frequently, having regard to:
 - (a) the particular circumstances of the ADI;
 - (b) the extent to which the information is required for the purposes of the prudential supervision of the ADI; or
 - (c) the requirements of the RBA or the ABS.
10. The information required by this Reporting Standard must be provided to APRA within 35 calendar days after the end of the reporting period to which this information relates.
11. APRA may, by notice in writing, extend the due date by which an ADI must provide the information required by this Reporting Standard, in which case the new due date will be the date specified in the notice of extension.

Note: For the avoidance of doubt, if the due date for a particular reporting period falls on a day other than a usual business day, an ADI is nonetheless required to submit the information required no later than the due date.

Quality control

12. All information provided by an ADI under this Reporting Standard (except for the information required under paragraph 6) must be the product of systems, processes and controls that have been reviewed and tested by the external auditor of the ADI as set out in *Prudential Standard APS 310 Audit and Related Matters*. Relevant standards and guidance statements issued by the Auditing and Assurance Standards Board provide information on the scope and nature of the review and testing required from external auditors. This review and testing must be done on an annual basis or more frequently if

required by the external auditor to enable the external auditor to form an opinion on the accuracy and reliability of the information provided by an ADI under this Reporting Standard.

13. All information provided by an ADI under this Reporting Standard must be subject to systems, processes and controls developed by the ADI for the internal review and authorisation of that information. These systems, processes and controls are to assure the completeness and reliability of the information provided.

Authorisation

14. When an officer of an ADI submits information under this Reporting Standard using the method notified by APRA, it will be necessary for the officer to digitally sign the relevant information using a digital certificate acceptable to APRA.

Transition

15. An ADI must report under the old reporting standard in respect of a transitional reporting period. For these purposes:

old reporting standard means the reporting standard revoked by the determination that makes this Reporting Standard (being the reporting standard that this Reporting Standard replaces); and

transitional reporting period means a reporting period within the meaning given in the old reporting standard:

- (a) that ended before 30 September 2025; and
- (b) in relation to which the ADI would have been required, if the old reporting standard had not been revoked, to report by a date on or after the date of revocation of the old reporting standard.

Note: For the avoidance of doubt, if an ADI was required to report under an old reporting standard, and the reporting documents were due before the date of revocation of the old reporting standard, the ADI is still required to provide any overdue reporting documents in accordance with the old reporting standard.

Reporting Form ARF 110.0

Capital Adequacy

Instruction Guide

This instruction guide is designed to assist in the completion of *Reporting Form ARF 110.0 Capital Adequacy*.

This form sets out the calculation of regulatory capital and associated capital ratios for an ADI at Level 1 and Level 2.¹ In completing these forms, ADIs should refer to *Prudential Standard APS 110 Capital Adequacy* (APS 110) and *Prudential Standard Capital Adequacy: Measurement of Capital* (APS 111).

General directions and notes

Reporting entity

The form is to be completed at Level 1 and Level 2 by all ADIs other than foreign ADIs and providers of purchased payment facilities.

If an ADI is a subsidiary of a NOHC, the report at Level 2 is to be provided by the ADI's immediate parent NOHC.²

Securitisation deconsolidation principle

Except as otherwise specified in these instructions, the following applies:

1. Where an ADI (or a member of its Level 2 consolidated group³) participates in a securitisation that meets APRA's operational requirements for regulatory capital relief under *Prudential Standard APS 120 Securitisation* (APS 120):
 - (a) special purpose vehicles (SPVs) holding securitised assets may be treated as non-consolidated independent third parties for regulatory reporting purposes, irrespective of whether the SPVs (or their assets) are consolidated for accounting purposes;
 - (b) the assets, liabilities, revenues and expenses of the relevant SPVs may be excluded from the ADI's reported amounts in APRA's regulatory reporting returns; and
 - (c) the underlying assets (i.e. the pool) under such a securitisation may be excluded from the calculation of regulatory capital (refer to APS 120). However, the ADI must still hold regulatory capital for the securitisation exposures⁴ that it retains or acquires and such exposures are to be reported in *Reporting Form ARF 120.1*

¹ 'Level 1' and 'Level 2' have the respective meanings given to those expressions in APS 001.

² Refer to paragraph 6 of *Reporting Standard ARS 110.0 Capital Adequacy*.

³ 'group' has the meaning given to that expression in APS 001.

⁴ Securitisation exposures are defined in accordance with APS 120.

Securitisation – Regulatory Capital. The risk-weighted assets (RWA) relating to such securitisation exposures must also be reported in ARS 110.0.

2. Where an ADI (or a member of its Level 2 consolidated group) participates in a securitisation that does not meet APRA's operational requirements for regulatory capital relief under APS 120, or the ADI undertakes a funding-only securitisation or synthetic securitisation, report such assets as on-balance sheet in APRA's regulatory reporting returns. In addition, these assets must also be reported as a part of the ADI's total securitised assets within *Reporting Form ARF 120.2 Securitisation – Supplementary Items*.

Capital treatment of joint arrangements

For capital adequacy purposes, ADIs must apply equity accounting for all joint arrangements, including joint ventures and joint operations.

Unit of measurement

This form must be completed in Australian dollars (AUD) in whole dollars with no decimal place.

Amounts denominated in foreign currency are to be converted to AUD in accordance with *Australian Accounting Standard AASB 121 The Effects of Changes in Foreign Exchange Rates*.⁵

Percentages are to be reported as an unconverted number to two decimal places or as specified. For example, 12.34 per cent is to be reported as 0.1234.

Specific instructions

The following instructions are applicable at Level 1 and (where relevant) Level 2.

Regulatory adjustments or deductions that would increase regulatory capital should be reported as a negative and adjustments or deductions that would decrease regulatory capital should be reported as a positive.

Section B: Risk Profile

This section summarises an ADI's RWA amounts for credit, operational and market risks and any other charges as required by APRA. To convert a capital charge for operational risk, market risk or any other item to a RWA equivalent amount, the amount of the charge must be multiplied by a factor of 12.5. The total RWA amount is used to calculate the capital adequacy ratio.

This form is designed to be used by all ADIs, irrespective of the approaches an individual ADI is applying to credit risk, operational risk and market risk. Consequently, not all line items are relevant to each ADI. An ADI must determine the line items it is required to complete based on the approaches it is applying.

1. Credit risk (excluding exposures in New Zealand subsidiaries)

This section captures the total credit risk-weighted amount of on-balance sheet assets and the risk-weighted credit equivalent amount of off-balance sheet exposures at Level 1/Level 2.

Securitisation exposures, risk-weighted in accordance with APS 120, are excluded from the amounts reported under section B, item 1.1 (refer to section B, item 1.2 below).
