

1 July 2013

Mr. Terry Jackson Senior Manager Specialised Institutions Division Australian Prudential Regulation Authority Level 15 QV1 Building 250 St Georges Terrace Perth WA 6000

Harmonising cross-industry risk management requirements

Dear Mr. Jackson

I refer to the consultation package released on 9 May 2013 relating to harmonised and enhanced risk management requirements across its regulated industries.

On behalf of the Board of Goldfields Money, I welcome the opportunity to make a response as part of the consultation process. Our primary concerns with the draft CPS 220 relate to the two main proposed enhancements and believe that overall the implementation of these requirements impose a significant cost to smaller ADIs which outweigh the benefits.

Risk Management Function and the Chief Risk Officer

Draft CPS 220 proposes institutions to designate a Chief Risk Officer (CRO) who is to be independent from business lines and the finance function. It explicitly excludes the CEO, CFO or Head of Internal Audit. For smaller ADIs like Goldfields Money, the risk management function can be efficiently handled by a small number of skilled staff who collaborate in implementing and managing the risk management framework. It is our view that this collaborative approach does not diminish the effectiveness of the ability to 'challenge the activities and decisions that may materially affect the risk profile of the organisation' as argued as a key reason in the Discussion Paper for the establishment of the CRO. All staff currently have unfettered access to the Board. In addition, the Board and the sub-committees have a better working knowledge of the day to day issues then with a larger organisation.

Board Risk Committee

The second proposed enhancement in the Draft CPS220 is the establishment of an Independent Board Risk Committee to strengthen the governance, effectiveness and resourcing

3/355 Stirling Highway Claremont WA 6010 PO Box 1006 Claremont WA 6910 T 08 9384 9113 | F 08 9286 2138 of the risk management framework. We believe that such a function is inefficient and duplicates the function of an Audit & Risk Management Committee where the current charter, roles and responsibilities provide a coherent framework in providing governance to the risk management function. There is a lot of crossover between audit and risk and there is potential for confusion and double-handling as to which committee is responsible for which role. To add another layer of committee structure where it is likely the members are the same adds no value and increases the cost of management and support and Director involvement. The independence will not be compromised by not having a separate committee as the current Audit & Risk Management Committee meet the same requirements.

The Discussion paper also notes that "the Board Audit Committee will continue to have responsibility for providing the Board, *inter alia*, with an objective review of the effectiveness of the institution's risk management framework". This appears to suggest that the Audit Committee is reviewing the output of the Board Risk Committee which appears an illogical outcome.

Risk management framework review and declaration

We note that new requirements are included in the draft CPS 220 in relation to an independent review of the appropriateness, effectiveness and adequacy of its risk management framework at least every 3 years. This is in addition to the annual internal and/or external audit compliance and effectiveness review. In addition, there is a new requirement for an annual risk management declaration which is an extension of the new requirements under APS 110 relating to the annual ICAAP report and accompanying declaration. We express the concern that continuing regulatory requirements post an unnecessary burden to smaller ADIs without any evidence off an enhanced risk management outcome.

Goldfields Money Risk Management

As you are aware, we have spent significant effort and resources, over the past 12 months in updating and improving our risk management framework, policies, risk appetite statement, risk reporting and staffing capability, and believe that this process has ensured a risk management capability and process which is appropriate given both our current size and our medium term strategic plan. In addition, the review of the ICAAP is that Goldfields Money is operating under a significant minimum capital ratio of 20% which provides a significant buffer for risk.

Cost Benefit Analysis

The estimate of the additional costs associated with this proposal is \$73,000 pa. Please find attached the report using the Business Cost Calculator attached to this letter.

Exemption for smaller institutions

We note that the Discussion Paper and the Draft CPS 220 provides for exemptions to be considered by APRA for smaller institutions that can demonstrate they meet, in substance, the principles underlying the requirements. It would be our intention that we would apply for an exemption to the requirements of employing a Chief Risk Officer and having a separate Board risk committee assuming the CPS 220 is finalised in substantially the same form as the draft version.

I would welcome the opportunity to discuss our response with you in person.

Yours Sincerely

1)act Hh

David Holden Managing Director
