

APRA RELEASES REQUEST FOR TENDER FOR DATA COLLECTION SOLUTION

17 August 2018

Dear subscriber,

Today APRA released its Request for Tender (RFT) on AusTender for the Data Collection Solution. The RFT specifies the required solution features, many of which were included as a result of the industry engagement conducted in the first half of this year.

This is a significant milestone in this project, and follows months of close engagement with key stakeholders including financial sector entities and RegTech companies. There is further to go but, with your continued support, we are getting closer to delivering a replacement for D2A that will be easy to use, adapt to future needs and reduce ongoing maintenance and support costs.

APRA will continue to engage with stakeholders through the three working/reference groups that were created to provide guidance and direction for key decisions as we implement the transition from D2A. Updates on these groups' discussions and activities, as well as progress on the tender process, will be posted on APRA's [Data Collection Solution](#) website.

Any queries regarding the RFT or tender process should be directed to procurement@apra.gov.au.

Yours sincerely,

Daniel Hunt

Business Lead, Data Collection Solution
