Glossary of terms

<i>Australian equities</i>	Means shares that are quoted on Australian stock exchanges.
<i>Margin call</i>	<p><i>Margin calls</i> occur when falls in the value of the borrower's <i>security</i> cause the <i>LVR</i> to exceed to borrower's maximum <i>LVR</i> plus the 'buffer'. The 'buffer' is typically about 5 to 10 per cent, and allows borrowers the utilise the maximum allowable <i>LVR</i> on their <i>security</i> without continually receiving <i>margin calls</i> due to usual fluctuations in share prices.</p> <p>In the event of a <i>margin call</i>, the borrower is contacted and is required to reduce the <i>LVR</i> on their <i>loan</i>, usually by contributing additional approved <i>security</i>, paying down the <i>loan</i> by selling part of the existing portfolio, or depositing additional cash.</p>
<i>Other margin loans</i>	Means any <i>margin loans</i> that are not <i>standard margin loans</i> or <i>protected margin loans</i> .
<i>Overseas equities</i>	Means shares that are quoted on stock exchanges other than an Australian stock exchange.
<i>Protected margin loans</i>	<p>Means <i>margin loans</i> that have a maximum allowable <i>LVR</i> of 100 per cent and the lender guarantees that the value of the borrower's underlying <i>security</i> will not be less than the value of <i>credit outstanding</i> at the end of the predetermined investment horizon.</p> <p>Borrowers with <i>protected margin loans</i> do not receive <i>margin calls</i>, but are charged a significantly higher <i>interest rate</i> than for <i>standard margin loans</i>. <i>Protected margin loans</i> in effect combine a <i>standard margin loan</i> with a put option on the assets purchased.</p>
<i>Security</i>	Means an asset (or assets) pledged by the borrower or a third party against a <i>loan</i> . In the event of default by the borrower, the lender has recourse to this asset.
<i>Standard margin loans</i>	<p>Means <i>margin loans</i> that typically have a maximum allowable <i>LVR</i> of 40 to 80 per cent, depending on the type of stock or managed fund that is provided as <i>security</i> for the <i>margin loan</i>.</p> <p>These <i>loans</i> are subject to <i>margin calls</i> if a decline in the value of the underlying <i>security</i> raises the <i>LVR</i> above the pre-specified maximum.</p>
