

Explanatory notes

Data

Data in this publication are sourced from quarterly and annual returns submitted to APRA under the Financial Sector (Collection of Data) Act 2001 by authorised general insurers.

Blank copies of the returns and associated instructions are available on the APRA website.

APRA welcomes feedback on the statistics and encourages industry and other stakeholders to review the information that is published for accuracy and consistency, so that the quality of the data collection and publications continues to be enhanced.

The performance statistics of insurers may be impacted by factors outside of their control, such as natural catastrophe events, as well as those driven by their internal processes, such as the timing of actuarial valuations. Users should take these factors into account when interpreting the statistics.

Notation

Amounts are expressed in Australian dollars.

Items which are blank indicate that either nothing was reported for the relevant period, item is not applicable or that the data cannot be calculated.

Disclaimer

While APRA endeavours to ensure the quality of this Publication, APRA does not accept any responsibility for the accuracy, completeness or currency of the material included in this Publication, and will not be liable for any loss or damage arising out of any use of, or reliance on, this Publication.

Forthcoming issues

This publication will be released according to the timetable published on the APRA website.
